Markdown Cheat Sheet

A quick reference for the most common Markdown syntax.

Headers

```
# h1
## h2
### h3
#### h4
##### h5
###### h6
```

Alternate style (h1 and h2 only):

```
Header 1
========

Header 2
--------
```

Emphasis

Style	Syntax	Alternate
Italic	`*italic*`	`_italic_`
Bold	`**bold**`	`__bold__`
Bold italic	`***bold italic***`	`___bold italic___`
Strikethrough	`~~strikethrough~~`	
Inline code	`` `code` ``	

Lists

Unordered (use `*` or `-`):

```
* Item 1
  * Nested Item 1
* Item 2

- Item 1
```

```
  - Nested Item 1
- Item 2
```

Ordered:

```
1. Item 1
2. Item 2
```

Task list (checkboxes):

```
- [ ] Checkbox off
- [x] Checkbox on
```

Links

Inline:

```
[link](http://google.com)
```

Reference-style:

```
[link][google]
[google]: http://google.com
```

Automatic:

```
<http://google.com>
```

Images

Inline (optional title in quotes):

```
![Image alt text](/path/to/img.jpg)
![Image alt text](/path/to/img.jpg "title")
```

Reference-style:

```
![Image alt text][img]
[img]: http://foo.com/img.jpg
```

Base64-embedded:

```
![Image alt text][img_base64]
[img_base64]: <...>
```

Code

Inline: wrap in single backticks, like `inline code`.

Indented block: indent every line by 4 spaces.

```
    4 space indent
    makes a code block
```

Fenced block (add a language for syntax highlighting):

````
```
code fences
```

```js
codeFences.withLanguage()
```
````

Blockquotes

```
> This is
> a blockquote
>
> > Nested
> > Blockquote
```

Horizontal Rules

```
---

****
```

Tables

```
| Column 1 Heading | Column 2 Heading |
| ---------------- | ---------------- |
| Some content     | Other content    |
```

Minimal form (no outer pipes or alignment padding):

```
Column 1 Heading | Column 2 Heading
--- | ---
Some content | Other content
```

Column alignment with colons:

```
| Left | Center | Right |
| :--- | :----: | ----: |
| a    | b      | c     |
```
